

ZIAD ABOUGHALEB

Full-Stack Web Developer

Shebin El-Kom, Menoufia, Egypt | ziadahmed2371@gmail.com | +20 10 03460524 | ziad-wdev.vercel.app
github.com/ziad-wdev | linkedin.com/in/ziad-wdev

Summary

Full-Stack Web Developer specializing in **React, Next.js, and the MERN stack**, building scalable, high-performance web applications. Experienced with **TypeScript, Tailwind CSS, REST APIs, Turborepo, and modern React tooling**, with a focus on reusable architecture, performance optimization, and maintainable code.

Education

SEF Academy - Remote

Nov 2025 – July 2026

Full-Stack Web Development

- Front-End Web Development Program: **98.92%**
- Back-End Web Development Program: **98.78%**
- Full-Stack Web Development Program: **98.85%**

Faculty of Electronic Engineering, Menoufia University

Oct 2023 – present

Electrical, Electronics, and Communications Engineering

- **Relevant Coursework:** Data Structures & Algorithms, Digital Logic

Skills

Front-End: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Vite, Tailwind CSS

Back-End: Node.js, Express, MongoDB, REST APIs

Libraries: TanStack Query, Redux Toolkit, React Router, React Hook Form, Stripe

Tools: Bun, Git, GitHub, Turborepo, npm Workspaces, Vercel, Vitest

Projects

E-Commerce Platform (Monorepo)

July 2026 – Aug 2026

Links: [GitHub Repo](#) | [Store Live Demo](#) | [Admin Dashboard Live Demo](#)

- Built a scalable **Turborepo** monorepo with **npm Workspaces**, developing a customer storefront and an admin dashboard that share reusable packages to improve maintainability and reduce code duplication.
- Built a customer storefront and admin dashboard using **React 19, Vite, React Router, Tailwind CSS v4, and TanStack Query**, implementing authentication, product and category management, shopping cart functionality, and **Stripe-powered checkout**.
- Created shared **UI, API, and utility packages**, enabling code reuse across applications and simplifying future feature development.

Next.js E-Commerce Platform

May 2026 – June 2026

Links: [GitHub Repo](#) | [Live Demo](#)

- Built a modern e-commerce application using **Next.js 16 (App Router), React 19, TypeScript, Redux Toolkit, and Tailwind CSS v4**, following scalable component architecture and best practices.
- Integrated the **DummyJSON API** with **RTK Query** to implement product browsing, search, category filtering, pagination, and dynamic product detail pages with efficient client-side caching.
- Developed persistent **shopping cart and wishlist** functionality using **Redux Persist**, delivering seamless state management and an improved user experience across browser sessions.

Personal Portfolio Website (ziad.dev)

Apr 2026 – Apr 2026

Links: GitHub Repo | Live Demo

- Built a fully responsive portfolio with **Next.js 16 and TypeScript**, integrating dynamic project data via the **GitHub API and Microlink API** to automate content updates.
- Implemented a production-ready contact system using **EmailJS and TanStack Form**, with client-side validation and real-time feedback via **Sonner notifications**.
- Added persistent **dark/light theme support** using localStorage and optimized rendering performance with modern React features.

Quizzler (Interactive Quiz Application)

Apr 2026 – Apr 2026

Links: GitHub Repo | Live Demo

- Built an interactive quiz application using **Next.js (App Router) and React 19**, fetching dynamic questions via the **Open Trivia Database API**.
- Created a **real-time countdown timer and automated scoring system**, increasing user engagement.
- Designed a responsive and accessible UI using **Tailwind CSS v4**, ensuring consistent performance across mobile and desktop devices.

DigitalPro (Marketing Agency Landing Page)

Mar 2026 – Mar 2026

Links: GitHub Repo | Live Demo

- Built a responsive marketing landing page using **React 19, Tailwind CSS v4, and Vite** to showcase services, team members, and core business metrics.
- Implemented **smooth scrolling, sticky navigation, and UI animations**, improving overall interaction experience.
- Designed a reusable component architecture and optimized build performance with **Vite**, enhancing load speed and maintainability.
