Summary

Junior Back-End Web Developer specializing in **Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, and Redis**. Experienced in building modular e-commerce APIs with authentication, session management, validation, caching, security middleware, file uploads, payment workflows, webhooks, and interactive documentation.

Education

Faculty of Electronic Engineering, Menoufia University, B.Sc. Electrical, Electronics, and Communications Engineering Oct 2023 – present

SEF Academy - Remote, Back-End Web Development Program Nov 2025 – Sept 2026

- Completed the back-end program with a score of **98.78%**.

Experience

SEF Academy Back-End Training - Remote, Back-End Web Development Trainee Aug 2026 – Sept 2026

- Collaborated on a production-style e-commerce REST API using Node.js, Express.js, MongoDB, Mongoose, and Redis.
- Owned authentication flows with JWT access tokens, HTTP-only refresh-token cookies, OTP verification, session management, validation, and role-based authorization.
- Contributed to 40+ documented REST operations across authentication, products, carts, wishlists, orders, reviews, users, and admin analytics.
- Integrated Redis caching, Cloudinary uploads, Stripe, PayPal, and Paymob payments with webhook workflows.
- Used Git and GitHub for feature development, code review, and integration.

Skills

Languages: JavaScript, TypeScript

Back-End Development: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, Redis

Security & Infrastructure: HTTP-only cookies, OTP verification, session management, role-based authorization, request validation, rate limiting, Docker

Integrations: Cloudinary, Stripe, PayPal, Paymob, Email workflows, Webhooks

Familiar With: Nest.js, Zod, SQL, Prisma

Projects

E-Commerce API

Aug 2026 – Sept 2026

Links: [GitHub Repo](#) | [API Documentation](#)

Technologies: Node.js, Express.js, MongoDB, Mongoose, Redis, Cloudinary, Stripe, PayPal, Paymob

- Developed a modular API with **40+ documented operations** for authentication, products, search, carts, wishlists, orders, reviews, users, and admin analytics.
- Implemented JWT authentication, OTP verification, HTTP-only refresh-token cookies, sessions, role-based authorization, request validation, rate limiting, and security middleware.
- Added Redis caching, Cloudinary image uploads, payment initialization, and Stripe, PayPal, and Paymob webhooks.
- Added Docker support and interactive API documentation; product uploads support up to five images and list endpoints support pagination up to 100 items.

E-Commerce Platform (Monorepo)

July 2026 – Aug 2026

Links: [GitHub Repo](#)

Technologies: REST API integration, JavaScript, Turborepo

- Collaborated across a shared monorepo to integrate customer and admin applications with backend services.
