## Summary

---

**Junior Full-Stack Web Developer** specializing in **React, Next.js, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in building team-based, production-style e-commerce applications, including modular REST APIs with authentication, validation, caching, payments, and third-party integrations, as well as responsive storefronts and admin dashboards.

## Education

---

**Faculty of Electronic Engineering, Menoufia University, B.Sc. Electrical, Electronics, and Communications Engineering** Oct 2023 – present

- **Relevant Coursework:** Data Structures & Algorithms, Digital Logic, Computer Networks

**SEF Academy - Remote, Full-Stack Web Development Program** Nov 2025 – Sep 2026

- Completed front-end, back-end, and full-stack training programs with scores of **98.92%**, **98.78%**, and **98.85%**, respectively.

## Experience

---

**SEF Academy Back-End Training - Remote, Back-End Web Development Trainee** Aug 2026 – Sep 2026

- Collaborated with a development team to build a production-style **e-commerce REST API** using **Node.js, Express.js, MongoDB, Mongoose, and Redis**.
- Owned the core authentication flow, implementing **JWT access tokens, refresh tokens stored in HTTP-only cookies, OTP email verification, password handling, request validation, and role-based authorization**.
- Implemented **Redis caching** for frequently accessed product and catalog data, reducing repeated database queries.
- Contributed to a documented API with **40+ documented REST operations** covering authentication, products, carts, wishlists, orders, users, and admin analytics; product endpoints support pagination with limits up to 100 and product uploads support up to five images.
- Integrated **Cloudinary** image uploads and **Stripe, PayPal, and Paymob** payment workflows, including payment webhooks.
- Used **Git and GitHub** in a collaborative workflow involving feature development, code review, and integration.

**SEF Academy Front-End Training - Remote, Front-End Web Development Trainee** Jul 2026 – Aug 2026

- Collaborated in a **team-based development environment** to build a production-style **e-commerce platform** using **React 19, Vite, TypeScript, Tailwind CSS, TanStack Query, and Turborepo**.
- Contributed to the **customer storefront and admin dashboard**, coordinating with teammates across a shared codebase to keep features consistent and review-ready.
- Used **Git and GitHub** in a collaborative development workflow to contribute features and integrate work across the team.

## Skills

---

**Languages:** JavaScript, TypeScript, HTML, CSS

**Front-End Development:** React 19, Next.js 16, Vite, Tailwind CSS, Redux Toolkit, RTK Query, TanStack Query, TanStack Form, Redux Persist

**Back-End Development:** Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, Redis

**Tools & Practices:** Git, GitHub, Turborepo, npm Workspaces, Docker, Vercel, Vitest

**Integrations:** Stripe, PayPal, Paymob, Cloudinary, EmailJS

**Familiar With:** Nest.js, Zod, SQL, Prisma

## Projects

---

### E-Commerce API

Aug 2026 – Sep 2026

**Links:** [GitHub Repo](#) | [API Documentation](#)

**Technologies:** Node.js, Express.js, MongoDB, Mongoose, Redis, Cloudinary, Stripe, PayPal, Paymob

- Collaboratively developed a modular **Express.js REST API** with **40+ documented operations** for authentication, product catalogs, search, carts, wishlists, orders, reviews, users, and admin analytics.
- Implemented **JWT authentication, OTP verification, HTTP-only refresh-token cookies, session management, role-based authorization, request validation, rate limiting, and security middleware.**
- Used **Redis caching** for frequently accessed catalog data and integrated **Cloudinary, Stripe, PayPal, and Paymob**, including payment webhook flows.
- Added Docker support and interactive API documentation to simplify local development and API testing; product uploads support up to five images and list endpoints support pagination up to 100 items.

### E-Commerce Platform (Monorepo)

Jul 2026 – Aug 2026

**Links:** [GitHub Repo](#) | [Store Live Demo](#)

**Technologies:** React 19, Vite, Tailwind CSS, TanStack Query, Turborepo

- Built a scalable **Turborepo monorepo** with customer and admin applications plus shared UI, API, and utility packages.
- Implemented authentication, product and category management, shopping cart functionality, responsive layouts, and Stripe checkout using reusable architecture.

### Next.js E-Commerce Platform

May 2026 – Jun 2026

**Links:** [GitHub Repo](#) | [Live Demo](#)

**Technologies:** Next.js 16, React 19, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS

- Built a modern e-commerce application featuring product search, filtering, pagination, product details, responsive layouts, and dynamic API-driven content.
- Implemented persistent **cart and wishlist** state with **Redux Persist** and integrated the **DummyJSON REST API** through RTK Query.

### Personal Portfolio Website

Apr 2026 – Apr 2026

**Links:** [GitHub Repo](#) | [Live Demo](#)

**Technologies:** Next.js 16, TypeScript, GitHub API, Microlink API, EmailJS, TanStack Form

- Built a responsive portfolio using **Next.js 16 and TypeScript**, integrating the **GitHub API and Microlink API** for dynamic project content.
- Developed a contact system with **EmailJS and TanStack Form**, adding validation, notifications, theme persistence, and performance optimizations.
