## SUMMARY

Junior Full-Stack Web Developer specializing in the **MERN stack** (MongoDB, Express.js, React, Node.js) plus **Next.js and TypeScript**. Experienced building team-based, production-style e-commerce applications, including modular REST APIs with authentication, validation, caching, payments, and third-party integrations, as well as responsive storefronts and admin dashboards.

## EDUCATION

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, TypeScript (*learning Go, Rust*)  
**Front-End:** React 19, Next.js 16, Vite, Tailwind CSS, Redux Toolkit, RTK Query, TanStack Query/Form  
**Back-End:** Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, Redis  
**CS Foundations:** Data Structures & Algorithms, Computer Networks, Digital Logic  
**Tools:** Git, GitHub, npm Workspaces, Docker, Unix/Linux, Turborepo, Vercel, Vitest  
**Integrations:** Stripe, PayPal, Paymob, Cloudinary, EmailJS  
**Familiar With:** Python, C++, Bun, Nest.js, SQL, Prisma, Zod

## PROJECTS

---

### E-Commerce API

Aug 2026 – Sep 2026

Node.js, Express.js, MongoDB, Mongoose, Redis, Cloudinary, Stripe, PayPal, Paymob

- Collaboratively developed a modular **Express.js REST API** with **40+ documented operations** for authentication, product catalogs, search, carts, wishlists, orders, reviews, users, and admin analytics
- Implemented **JWT authentication, OTP verification, HTTP-only refresh-token cookies, session management, role-based authorization, request validation, rate limiting, and security middleware**
- Used **Redis caching** for frequently accessed catalog data and integrated **Cloudinary, Stripe, PayPal, and Paymob**, including payment webhook flows
- Added Docker support and interactive API documentation to simplify local development and API testing; product uploads support up to five images and list endpoints support pagination up to 100 items

### E-Commerce Platform (Monorepo)

Jul 2026 – Aug 2026

React 19, Vite, Tailwind CSS, TanStack Query, Turborepo

- Built a scalable **Turborepo monorepo** with customer and admin applications plus shared UI, API, and utility packages
- Implemented authentication, product and category management, shopping cart functionality, responsive layouts, and Stripe checkout using reusable architecture

### Next.js E-Commerce Platform

May 2026 – Jun 2026

Next.js 16, React 19, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS

- Built a modern e-commerce application featuring product search, filtering, pagination, product details, responsive layouts, and dynamic API-driven content
- Implemented persistent **cart and wishlist** state with **Redux Persist** and integrated the **DummyJSON REST API** through RTK Query

### Personal Portfolio Website

Apr 2026

Next.js 16, TypeScript, GitHub API, Microlink API, EmailJS, TanStack Form

- Built a responsive portfolio using **Next.js 16 and TypeScript**, integrating the **GitHub API and Microlink API** for dynamic project content
- Developed a contact system with **EmailJS and TanStack Form**, adding validation, notifications, theme persistence, and performance optimizations
